Generalist Repository Comparison Chart

doi: 10.5281/zenodo.3946719

This chart is designed to assist researchers in finding a generalist repository should no domain repository be available to preserve their research data. Generalist repositories accept data regardless of data type, format, content, or disciplinary focus. For this chart, we included a repository available to all researchers specific to clinical trials (Vivli) to bring awareness to those in this field.

Project Description

Summary

This study, the seventh in a series of national election studies in the Netherlands, focused on the elections for the Second Chamber of Parliament on May 21, 1986. The survey included questions on government policies, and specific political issues such as abortion, euthanasia, nuclear energy, nuclear armaments, and income differences. The survey also examined each respondent's voting behavior and vote intentions in the 1986 Second Chamber elections as well as respondent exposure to polls and expectation of election results. A second wave of interviews conducted after the 1986 elections included trait evaluations of key political figures and sympathy scores toward various political parties and social movements. Other variables cover party identification, coalition preferences, union membership, and religion. Demographic data such as age, sex, and occupation are also included.

Methodology

Sample

To obtain a fresh sample for the 1986 election, the same procedure employed in the 1981 and 1982 Dutch Parliamentary Election Studies was used. A sample of households was drawn from the Netherlands mail-delivery register. From each household, one person was selected at random (by a fixed and predetermined procedure) from all those eligible to vote in the May 21, 1986, election for the Second Chamber of Parliament.

Universe

Eligible voters in the May 21, 1986, election for the Second Chamber of Parliament living in households listed in the Netherlands mail-delivery register.

Conformal Elasticity of Mechanism-Based Metamaterials

Michael Czajkowski; Corentin Coulais; Martin van Hecke; D. Zeb Rocklin

This is the replication package supporting the paper "Conformal Elasticity of Mechanism-Based Metamaterials"

https://arxiv.org/abs/2103.12683

it contains:

- Rawdata1: experimental raw data for the first experiment ("the foot")
- Rawdata2: experimental raw data for the second experiment ("the bridge")
- Experimental_codes_ProcessedData: codes to process the rawdata and processed data
- PyLab: custom made python packages for the processing codes
- NumericalData: numerical codes and raw data (using the software abaqus)
- Mathematica_scripts: Mathematica scripts to derive the theory and compare it to the experimental and numerical data

experimental and numerical raw data as well as processing codes (python and mathematica)

SIMCUR (Social Integration of Migrant Children - Uncovering Family and School Factors Promoting Resilience)

Leyendecker, Birgit; Mesman, Judi; Oppedal, Brit

GESIS Data Archive, Cologne. ZA5958 Data file Version 1.0.0, <https://doi.org/10.4232/1.12705>

Abstract: The main objective of the SIMCUR research project is to uncover the processes underlying developmental resilience in children from immigrant families during the transitions to primary and secondary education in three European countries. These processes are examined at the levels of the individual, the family, the school, and the community. By comparing children in Germany, the Netherlands, and Norway, the study also elucidates the impact of broader societal influences. In a longitudinal cohort design based on the two school transitions, we studied 880 migrant families with origins in Turkey at ... [more](#)
